1 Installation Hypercard 3G

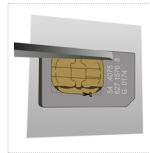

2

3 Method 1:
Stick the template onto the simcard and
cut along the marks

4 Cut along the marks (dotted line)

5 Method 2:
Use the Sim cutter to cut the simcard

6 Now you have 2 cut sim cards

7 Put the 2 cut sim cards into Hypercard3G

8 Close the dualsim adapter with the socket

9 This is how the dualsim looks like before
putting into the mobile phone sim slot

- 10 Place the dualsim card into the mobile phone's simslot

- 11 Close the slot

- 12 Start the phone and you will find Hypercard V3 Dualsim Menu under „Programs“. In some other phones you may find the dualsim menu under „Settings“, „Applications“ or „Entertainment“

- 13 Hypercard V3 Menu in the phone

- 14 If you want to use a cut sim card in single mode again (without dualsim), use the single holder and fix the card with tape (2 single holder and tape are part of any Hypercard 3G kit)

- 15 Put the cut sim into single sim holder

- 16 Use tape to fix the cut card into the single holder, then use it just like any other sim card

- 17 Fixed cut sim

- 18 Fixed cut sim in single mode with single holder → just as any normal sim card
